

New Office Building Boskalis

New office building for Boskalis in Papendrecht

The project

Due to the growth of the business a fourth office building is constructed within the existing complex, providing approximately 500 new workplaces. A company restaurant which seats about 400 people is included in the new building.

In addition to the architectural and constructive work, we were also responsible for the coordination of, for example, the services installation work. The four storey building is built within the existing business park and has a gross floor area of approximately 8500sqm.
