

Quality upgrade of car park P1

Car park P1 is located in the heart of Schiphol Centre and has undergone a quality upgrade.

The project

The project was carried out in six stages and in such a way that as many parking spaces as possible could be retained during the works.

The project consist of:

- waterproofing of the roof (approx. 40 000sqm);
- replacing the joint sealants between prefab TT-beams;
- coating the floors (about 106 000sqm);
- painting columns, walls and ceilings (about 222 000sqm);
- coordinating three subcontractors (two installers and one structural)

Structural (maintenance) work for Car Park P1 part E0/E-1/new location for car rental companies and Maintenance Upgrade P1 A0-B0 were already completed.

Main Contractor

This project has been delivered by VolkerWessels Bouw Schiphol (a trading name of Visser & Smit Bouw bv).
