

Extension of Heineken complex

The extension of the Heineken complex in Zoeterwoude.

The project

The extension of the Heineken complex comprises:

- offices
- process technology lab
- beer tank -/yeast loader
- canopy over Colonnelaan
- tankpark V
- biotower
- fit-out of 30 HL brewhouse
- test packing installation in warehouse
- Colonnelaan 4
- team room Colonnelaan 3
- expansion of loading pit
- dock + canopy Colonne 3

In addition, various maintenance work were carried out. Visser & Smit Bouw was also responsible for (detail) engineering works.

The works timescale had been agreed jointly with the client, with an eye for logistics and reducing construction time. Visser & Smit Bouw was responsible for the E- and W- installations and all construction work including the fit-out.

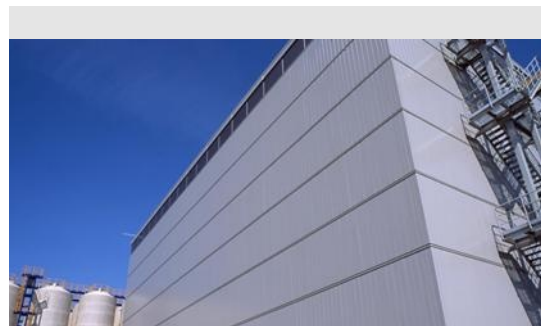

Visser & Smit Bouw is also involved in the ongoing maintenance.
