

Renovation and construction of Day Surgery Centre VUmc

Renovation and construction of Day Surgery Centre for the VUmc, Amsterdam.

The project

The project comprised the construction of six operating theatres with auxilliary areas, a recovery room with 12 beds, 5 pre-/postoperative rooms with altogether 26 beds, changing rooms, storage, and reception-/waiting rooms. In total 2400sqm; the rooms are situated on the first and second floors of the building beside the main entrance on the Boelelaan.

We took into account the 24 hours operation of the hospital and kept disruption to a minimum.

Main Contractor

This project was delivered by [MedicomZes](#) (a trading name of Visser & Smit Bouw bv).
