

Construction of BC-corridor

In the heart of the operational area of Schiphol Airport a new corridor was constructed over the New South baggage basement. The existing corridor was demolished. In addition, a number of commercial facilities were also constructed.

The project

The design of the BC corridor included a steel structure that connects the South baggage basement and the B-pier and a 300 m long concrete corridor at first floor level in the South baggage basement. The old BC-corridor has been demolished.

As Main Contractor VolkerWessels Bouw Schiphol was responsible for coordinating all subcontractors.

Works included:

- the new BC-corridor
- demolition of the existing corridor and
- a number of commercial facilities.

Main Contractor

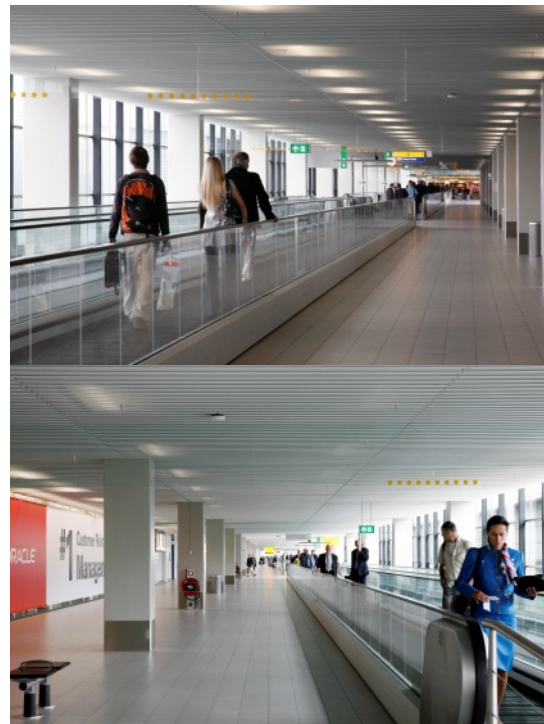

The project was delivered by VolkerWessels Bouw Schiphol (a trading name of Visser & Smit Bouw bv).
