

## Extension Sulfron Teijin Aramid

Extension of existing site from Teijin Aramid in Emmen.

### The project

The project comprised of:

- High rise 30m
- Four floors of 250sqm each
- First floor: concrete portal frames approximately 500m<sup>3</sup>
- Other floors of steel construction with lattice girder slabs by Visser & Smit Bouw
- Facades: sandwich panels
- Foundation: screw piles
- In addition, other works in the existing buildings.
